Introduction to Load Calculations

Load calculation principles and ACCA Manual J software will be shown.

Proper Sizing is a RI Building Code requirement. This webinar information is useful whether selling, installing, or inspecting HVAC systems.

Learn the basics and see a demonstration of free Manual J software.

Wednesday March 31st @ 1-3PM

Introduction to Duct Design

As heat pumps become a bigger part of the HVAC landscape, installing properly sized ducts becomes critical.

The ACCA Manual D principles, demonstrated using the free ACCA Speed Sheet, can eliminate Rule of Thumb ductwork “mistakes”.

This is critical when installing the compact ducted, low static pressure air handlers that often are used with mini split heat pump systems.

Wednesday April 14th @ 1-3

Heat Pump Water Heaters Best Practices

Understanding how a HPWH heats water can help solve installation and sizing mistakes.

Practical experience, manufacturers venting options, and sizing discussed.

Wednesday April 28th @ 1-3
